Frequency	Ports	Tilt	Gain	Beamwidth
698-960MHz	6	eRET	15.0	69°
1695-2690MHz	12	eRET	17.8	65°
3300-4200MHz	24 +3	eRET	16.5	90°

PRODUCT INFORMATION

Stack	Part Name	Description
1	Base Stack	The Base Stack contains the 3300-4200 Beamforming Sectors. There is a Mount Plate located on the bottom of the Base Stack to attach to the Monopole.
2	Extension Stack	The Extension stack contains the Low Band and Mid Band sectors.

The Modular Tri-Sector T2 Series is a flexible antenna platform designed for Streetwork deployments. The AWT2 Platform is made up using discrete parts. The AWT2-3836 consists of two modular antenna stacks which are detailed in the table below:

Stack Type	Frequency Bands	Ports per Stack
Base Stack	3300-4200MHz	24 +3
Extension Stack	698-960MHz 1695-2690MHz	6 12

Each stack is made up of three panels that are positioned at 0°, 120° and 240° in the Azimuth plane. These individual panels are replaceable in the field for upgrade or maintenance purposes.

Note #1: The Alpha Wireless AWT2 series can only support a single Base Stack and a single Extension Stack. The Alpha Wireless AWT4 series can support a single Base Stack and up to three Extension Stacks.

Note #2: Both the AWT2 and AWT4 have a mounting plate to enable mounting number of Active Antenna units on top, weight permitting.

APPLICATION

Sector antennas support multiple antennas into one attractive package. These canisters deliver an elegant macro solution for pole-top, rooftop and streetworks applications. Alpha Wireless produces one of the smallest diameter canisters in the marketplace.
