## PRODUCT INFORMATION

Stack	Part Name	Description
1	Base Stack	This is the antenna stack supplied with the AWT2-3926. There is a Mount Plate located on the bottom of the Base Stack to attach to the Monopole.
2	Extension Stack	This antenna stack is not supplied with the AWT2-3926. It can be bought at a later date and mounted on top of the Base Stack if additional capacity is required

The Modular Tri-Sector T2 Series is a flexible antenna platform designed for Streetwork deployments. The AWT2 Platform is made up using discrete parts. The AWT2-3926 consists of two modular antenna stacks which are detailed in the table below:

Stack Type	Frequency Bands	Ports per Stack
Base Stack	612-896MHz	6
	1695-2690MHz	12

Each stack is made up of three panels that are positioned at 0°, 120° and 240° in the Azimuth plane. These individual panels are replaceable in the field for upgrade or maintenance purposes.

**Note #1:** The Alpha Wireless AWT2 series can only support a single Base Stack and a single Extension Stack. The Alpha Wireless AWT4 series can support a single Base Stack and up to three Extension Stacks.

**Note #2:** Both the AWT2 and AWT4 have a mounting plate to enable mounting number of Active Antenna units on top, weight permitting.

## APPLICATION

Sector antennas support multiple antennas into one attractive package. These canisters deliver an elegant macro solution for pole-top, rooftop and streetworks applications. Alpha Wireless produces one of the smallest diameter canisters in the marketplace.

## STANDARD &amp; CERTIFICATIONS

Certification BS EN ISO 9001:2015

The parameters in this specification follow the definitions and recommendations per NGMN P-Basta, Release 9.6.
