

Densify Small Cell D-RAN and C-RAN networks at public street level with Micro Streetworks, cost-effective microsites that blend with existing street furniture for quick approvals.

Providing 360° multi-spectrum 5G capacity in the smallest foundation footprint, this all-in-one solution includes a 16-port multiband omnidirectional canister antenna, pole, cabinet and cables, plus installation and commissioning services.

Innovative Technology

- Our Micro Streetworks solutions combine novel materials and innovative design to reduce costs and speed 5G service to market.
- With an innovative cabinet assembled around the composite pole, this solution offers the smallest foundation footprint.

Features & Benefits

- Provides 360° of 1695–2690/3300–4200 MHz 5G coverage with support for multiple RRUs.
- A single antenna platform supports 4x4 MIMO for mid band deployments.
- Use existing power and fiber infrastructure for rapid deployment.
- Improve aesthetic appeal with lights, banners and advertising decals.

Low-cost Deployment

Smallest Site Footprint

Rapid Zoning Approvals
