

With innovative materials and compact designs, our Micro Streetworks solutions **enable seamless deployment in urban, suburban, and high-traffic areas**, whether replacing aging infrastructure or deploying new sites.

Accelerate small cell deployment with **Micro Streetworks**, cost-effective solutions for D-RAN and C-RAN networks at the public street level. These **sub-10-meter microsites blend seamlessly** with existing infrastructure, ensuring rapid zoning approvals and low-cost deployment.

Compact, Cost-Effective 5G Densification

Delivering 360° multi-spectrum 5G coverage in the **smallest foundation footprint**, these turnkey solutions include a **multiband omnidirectional canister antenna, composite pole, cabinet, and cables**, plus installation and commissioning services.

Designed for Efficiency, Aesthetics & Performance

Micro Streetworks can accommodate both high- and low-powered radios based on deployment needs.

This solution discreetly houses two macro high-power radios in a sleek, compact design.

Low-cost Deployment

Smallest Site Footprint

Rapid Zoning Approvals

Multi-spectrum 5G Coverage
